

11.8,

I am Safir. I'm a student in class seven. I'm passionate to visit new places and talk to new people. I live with my parents and my younger sister, Bushra in Khulna. My sister and I watched a travel show about the Sundarbans on TV six months ago. Both of us were eager to visit the Sundarbans and shared our desire with our parents. They agreed to take us on a trip to the Sundarbans during the upcoming winter vacation. It was December last year. Our final exams had just been over. We started our journey from Khulna River port at 9 pm on a ship. After some time, the sun rose from the east of the deep sea. This moment was simply incredible. Bushra and I were fascinated by the beauty around us. When we landed at Kotka sea beach, We found **the beach to be even more beautiful than we had imagined. The sand was white and the water was crystal clear. Wwe spent the whole day playing in the water, building sand castles, and taking in the sights and sounds of the beach. As the sun set, we sat on the beach, watching the colors of the sky change from orange to pink to purple. It was truly a magical day and one that we will always remember.**

A few travelers joined us. We were roaming around and met a forest officer. I got the chance to know about the trees, honey and animals of the sundarbans, specially the royal bengal tiger. So i asked him "Can you tell me more about the royals bengal tiger? How often do they come across in the sundarbans and what is the best way to spot one"

I listened to him with great interest and thanked him for his valuable information i know it would be a great opportunity for me to see the royal bengal tiger in tits natural habitat and i couldn't wait to start our journey.

It was a great experience to talk to the first officer. He offered us tea. He requests us saying. "I would like to request you all to please be careful during your journey in the sundarbans. The forest is home to many wild animals and it is important to follow the guidelines and instructions of the guids at all times. Do not venture off the designated paths and always be aware of your surroundings. Remember that this is their home and we are just visitors. It would be great if you all could contribute to preserving the beauty and biodiversity of the sundarbans."

We thanked him for his guidance and advice and promised to take all the necessary precautions. We drank the tea he offred and set off on our journey, ready to explore the stunning beauty of the sundarbans and its inhabitants. It was a once in a lifetime opportunity and we were determined to make the most of it.

He also gave us some instructions for our safety like "don't feed the animals or leave any food or trash behind. This can not only harm the animals but also disrupt their natural feeding habitats. Also, don't try to approach any wild animals too closely or touch them. They may be unpredictable and could become aggressive. The best way to observe them is from a safe distance. And always carry a first aid kit and a map with you in case of emergencies."

The forest officer's words echoed in my mind as er set off on your journey. I knew that the sundarbans was a wild and unforgettable place, but i also knew that it was full of beauty and

wonder. I was determined to take in all that it had to offer while also being mindful of the safety instructions that the officer had given us

Our next destination was dublar chor. When the ship was moving along the river, suddenly i saw a glimpse of a royal bengal tiger drinking water from the river. My sister was initially frightened at the sight of the animal. But she overcame her fear and started taking pictures of the majestic royal bengal tiger. Soon the ship reached dublar chor. This island is located in the bay of bengal. It is surrounded by a deep blue sea. Once again, we were astonished by the beauty of the island. Out of surprise my sister shouted “look over there! Dolphins! They're jumping out of the water!

We all turned to where hse was pointing and sure enough, a pod of dolphins was leaping and playing in the waves. My sister's face lit up with excitement as she quickly grabbed her camera to capture the moment. It was a sight to behold, and we all stood there in awe as we watched the dolphins play in the sea.

Aas we reached the shore of dublar chor, we were greeted with the sight of a pristine white sand beach and crystal clear waters. The island was truly a natural wonder, and we were all so grateful for the opportunity to witness its beauty. We spent the rest of the day exploring the island, swimming in the sea and collecting shells.

The trip to dublar chor was an unforgettable experience, and one that we would always treasure. We also felt a sense of responsibility to spread awareness about the importance of preserving our natural heritage for the future generations. We realized that it's our duty to protect the natural beauty of the world for future generations, and we decided that we would do our part to contribute to conservation efforts in any way we could.

My parents also become so charmed with the beauty of the island. They said happily “we must come back here again, it's truly a paradise on earth. The natural beauty of the island, the crystal clear waters, and the friendly locals have left a lasting impression on us. We're so glad that wee decided to take this trip again, it's an unforgettable experience that we'll always remember.”

Their words filled me with joy and i couldn't agree more. Dublar chor had truly been a magical place, one that we had all fallen in love with. We spent the rest of the evening reminiscing about our adventures on the island and planning our next trip.

We knew that dublar chor would always hold a special place in our hearts, and we were determined to return to this paradise on earth as soon as er could. And so we made a promise to ourselves to return to dublar chor, and to continue to explore the world and its natural beauty, together as a family. Our time was limited so it was time to return home. I was sad to leave so soon. We told goodbye to each other saying “goodbye dublar chor, we'll be back soon.” but I will cherish the memories of the visit all my life.
